DETAILED ACTION

Election/Restrictions

Applicant's election without traverse of claims 1 and 5-7 in the reply filed on September 2, 2004 is acknowledged.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 5-7 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claim 5 recites the limitation "a seat" in line 3. Claim 1 also recites "one seat." The result is a double inclusion since it is not clear whether two seats are claimed or one. Claim 6 recites, "the circular seat" in lines 2-3, which lacks antecedent basis.

In order to expedite prosecution, examiner recommends that applicant carefully review and properly amend all claims necessary to generally improve clarity where needed, and to correct all claims that may lack antecedent basis.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

Art Unit: 3731

A person shall be entitled to a patent unless –

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

Claims 1, 5 and 6 are rejected under 35 USC 102(e) as being anticipated by U.S. Patent No. 6,193,721 to Michelson. Michelson discloses an orthopedic implant in Fig. 7 comprising bores 6, circular seats 20, and an elastically deformable retaining means illustrated in Fig. 29. The retaining means may also be considered an "open washer." The hole 24 is considered an opening.

Allowable Subject Matter

Claim 7 would be allowable if rewritten to overcome the rejections under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action and to include all of the limitations of the base claim and any intervening claims.

The following is a statement of reasons for the indication of allowable subject matter: the prior art fails to disclose or suggest all of the limitations of claim 7 including, "the opening [is] placed above one of the bores."
